In an interview with David Jasper from *The Bulletin*, which has served Central Oregon since 1903, Miguel explains how he was able to be the artist creating the 2018 Cauldrin for the Special Olympics. “(Dale) Chihuly, a big glass artist in Seattle — he’s kind of The Rolling Stones of the glass world. ... They wanted somebody local to do it, and so they approached his organization. The CFO promptly sent them my way. But it was kind of a twofold thing. ... Also, a friend of mine I worked with years ago doing event management and production stuff was working for the Special Olympics production subcontractor. He put my name in the hat, also, and so my name came at them from two directions, and then I had to do a proposal. I think by the time they got to the proposal part of it, they were only looking for a proposal from me.” [Click here for the entire article.](#)

# PERSEUS

Perseus is a kinetic sculpture built for the Center on Contemporary Arts' "Heaven and Earth II" temporary sculpture exhibit at Carkeek Park. This piece is wind powered kinetic, and also utilizes solar powered LEDs and stands over 22' tall. The pendulum in the center is the same radius as the three legs.

AVAILABLE FOR  
CITY ARTS  
PROJECTS

It occurred to me as I was completing Perseus that the intersection of sculpture and performance was not very explored so I collaborated with Tick Tock a renowned modern aerial troupe, founded by Liza Rose. Tick Tock did 3 performances in the park in the fall of 2010 and then a another series of performances the following summer at The Smoke Farm. The summer of 2012 Perseus was part of the Peace Arch Park International Sculpture Exhibition.

Steel, Stone, Mirror, Solar Panels, LEDs  
256" x 165" x 165"

AVAILABLE for purchase
